EXPERIENCE

Software Developer Trainee

Amak Solution

October 2023 – April 2025, Vadodara, Gujarat, India

- During my 6-month internship at **Amak Solution** as a Software Trainee, I gained hands-on experience by handling website hosting, performing server migrations, and importing data into MySQL.
- I developed web pages using HTML, CSS, and PHP, resolved client issues, and updated SEO through CMS platforms.
- I also designed a travel agency prototype on Wix, conducted website testing, fixed bugs, and documented changes.
- Additionally, I contributed to tools like HRM, CRM, ERP, WhatsApp CRM, and inventory management software.
- This internship enhanced my technical skills, deepened my understanding of client needs, and prepared me for real-world challenges.

PROJECT

Employee Leave Management

- Developed an Employee Absence Management Module using HTML, CSS, JavaScript, and MySQL to handle time-off requests and balance tracking.
- Implemented role-based access for Employees, Managers, and Admins with real-time approval workflows and notifications.
- Enabled Admins to configure holidays, manage policies, and maintain complete absence records with status history.

Online Cloth Shop

- Designed and developed a user-friendly online clothing store using HTML, CSS, JavaScript, and MySQL, allowing customers to browse, search, and purchase products.
- Implemented key features like product listing, filtering by category, shopping cart, order placement, and checkout system.
- Created an admin panel to manage inventory, update product details, and view customer orders.
